Who Are We

We are pioneers in cellular nutrition and regenerative health, driven by the precision and excellence of Swiss biotechnology. Founded on the groundbreaking discoveries of a globally recognized professor, our innovations are protected by a worldwide patent in stem cell technology – a testament to our scientific credibility and leadership. We blend longevity science, Swiss purity, and cell-level efficacy to create transformative wellness solutions that empower people to live healthier, longer, and more vibrant lives.

Innovating Stem-cell Solution

What We Do

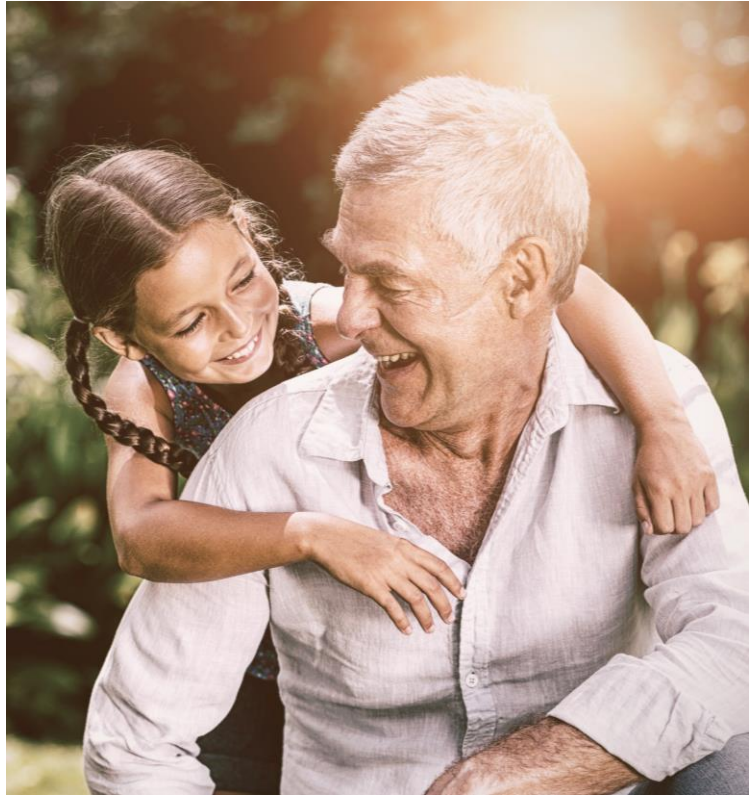

We develop and deliver cutting-edge, patented stem cell-based solutions designed to combat cellular aging and dysfunction. Our flagship innovation, Blue-i®, harnesses the power of Swiss-engineered PhytoMarine Stem Cells to rejuvenate vital organs, enhance oxygenation, boost energy, and restore cellular balance. Beyond nutrition, our research encompasses skincare, anti-aging, and regenerative therapies, bridging the gap between science and wellness. At Cellegence, we are committed to making advanced stem cell solutions not an extravagant hope, but a universal right.

To Create A World Where Stem-Cell Solution is a Right, Not an Extravagant Hope

At Cellegence, we believe stem cell innovation should be a universal right, not a privilege. Longevity and vitality should not be a luxury, but a fundamental right for every individual.

Our vision is to make advanced cellular health solutions accessible to all—transforming wellness and vitality into everyday realities worldwide.

Our Vision

To Continuously Enhance Longevity And Vitality Through Patented Stem Cell Innovations Developed In Switzerland

At Cellegence, our mission is to redefine wellness by continuously enhancing human longevity and vitality through Swiss-engineered stem cell innovations. We combine over two decades of scientific breakthroughs with patented biotechnology to create solutions that work at the cellular level – restoring balance, boosting energy, and strengthening immunity. Our commitment is not just to extend life, but to enrich it with health, clarity, and vitality.

The Scientific Power behind Stem Cell Innovation

- Clinically proven antioxidant and anti-inflammatory effects.
- Stimulates red blood cell production to enhance oxygen delivery and vitality.
- Supports mitochondrial health, enhancing cellular energy and metabolic function.
- Molecular structure mimics hemoglobin, making it highly bioavailable and body-compatible.
- Protects cells from oxidative stress, slows cellular aging, and strengthens immune defense.

Our Team

Laxus Ong

Founder & CEO

13+ years of expertise in nutrition, neuroscience, and corporate training across Asia. Specialized in designing impactful educational systems and business academies for 50+ organizations, including enterprises and political institutions. Known for scalable training solutions that enhance growth, capability, and long-term success.

“At Cellegence, we don’t pursue perfection once – we perfect consistency and excellency every day.”

Our Team

Rix Toh

Co-Founder & CFO

A seasoned financial strategist and entrepreneur with 15+ years in banking, finance, insurance, and business leadership. Transitioned from corporate banking to successfully building and expanding a private enterprise under Sdn Bhd. A Certified NLP Practitioner with a unique approach to leadership, team development, and client relations. Skilled in financial consultancy, compliance, growth strategies, and holistic engagement, holding multiple certifications across life, general, and investment-linked insurance.
